

## Coronavirus disease (COVID-19)

#### **Situation Report - 165**

Data as received by WHO from national authorities by 10:00 CEST, 3 July 2020

#### **Highlights**

WHO Director-General Dr Tedros and WHO Regional Director for Europe Dr Hans Henri P. Kluge addressed the European Parliament Committee on the Environment, Public Health and Food Safety on the global response to COVID-19. "The EU is in a unique position to provide global leadership in defining the 'new normal' as part of the global recovery," Dr Tedros said, though he cautioned parliamentarians that, globally, the situation "is still getting worse."

The <u>Regional Officer for the Americas/PAHO has released a report that presents an overview of PAHO's response to the COVID-19 pandemic</u>. It also provides an analysis of the epidemiological situation in the Americas and the impact of the spread of the virus on health systems in Latin America and the Caribbean.

WHO is working with the Kenyan Ministry of Health, and leveraging 21 community radio stations throughout the country to relay COVID-19 messages and conduct debates and discussions on the disease and its spread. <u>"Community engagement is critical in this response," says Dr Rudi Eggers, WHO Kenya Representative</u>.

The United Nations Secretary- General's Special Representative to Somalia, Mr James Swan, has called for <u>continuing international support to the Somali government's response to COVID-</u>
19 and praised the efforts of frontline health care workers.

#### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Western Pacific	219 543 cases (839)	7 463 deaths (5)
South-East Asia	860 785 cases (27 050)	23 240 deaths (471)
Europe	2 737 869 cases (-10 444)	198 945 deaths (537)
Eastern Mediterranean	1 115 561 cases (18 996)	26 028 deaths (511)
Americas	5 445 710 cases (127 918)	255 702 deaths (3 362)
Africa	329 796 cases (11 364)	6 486 deaths (146)
Globally	10 710 005 cases (175 723)	517 877 deaths (5 032)

### Subject in Focus: New online course released on controlling the spread of COVID-19 at ground crossings

A new, interactive e-learning course entitled "Controlling the Spread of COVID-19 at Ground Crossings" is now available from the following link: <a href="https://extranet.who.int/hslp/training/course/view.php?id=333">https://extranet.who.int/hslp/training/course/view.php?id=333</a>

This course was developed based on the interim guidance, "Controlling the Spread of COVID-19 at Ground Crossings", and the "Handbook for public health capacity-building at ground crossings and cross-border collaboration". The online course is currently accessible with or without a user account and can be downloaded on personal computers and mobile phones. It complements the COVID-19 course "Management of ill travelers at points of entry in the context of the COVID-19 outbreak". It is intended for a range of audiences, including: national International Health Regulations (IHR) focal points; authorities responsible for implementing the IHR at ground crossings; representatives of government and non-government organizations and their partners at ground crossings; and public health professionals involved in disease surveillance, communication, emergency preparedness and response, animal health, and environmental health at ground crossings and in nearby communities.

The objectives of the course are to reduce the spread of COVID-19 resulting from travel, transportation, and trade on and around ground crossings by:

- 1. Identifying priority ground crossings and communities;
- 2. Scaling up preparedness and control measures at these locations, including:
  - Legal enforcement and planning
  - Cross-border collaboration
  - Supplies of infection and control equipment and material
  - Acute emergency response during mass movement across the border
  - Interviewing and managing sick travellers with suspected COVID-19
  - Surveillance
  - Risk communication and community engagement
  - Risk monitoring and adaptation of health measures based on changing trends

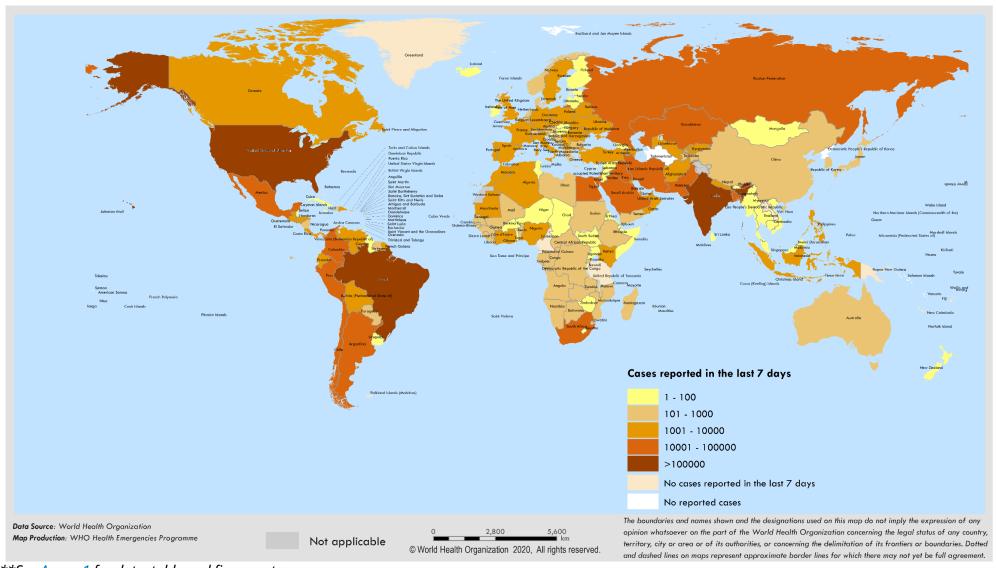

The course is easy to navigate and takes about an hour to complete. The course outline is presented below:

Throughout the course, there are seven scenarios that challenge the learner to respond appropriately to realistic situations. The course ends with a 10- question quiz that assesses the learner's comprehension of the material and provides a review of key points. A certificate of completion is available if you take the course with a user account and if your total score on the quiz is above 80%.

# IDENTIFICATION KEY PREPAREDNESS AND RESPONSE ACTIVITIES 1. Legal enforcement and planning 5. Interviewing and managing sick travellers with suspected COVID-19 2. Cross border collaboration 6. Surveillance 7. Risk communication and 7. community engagement 4. Acute emergency response during 4. mass movement across the border 8. Risk monitoring and adapting health measures as trends change

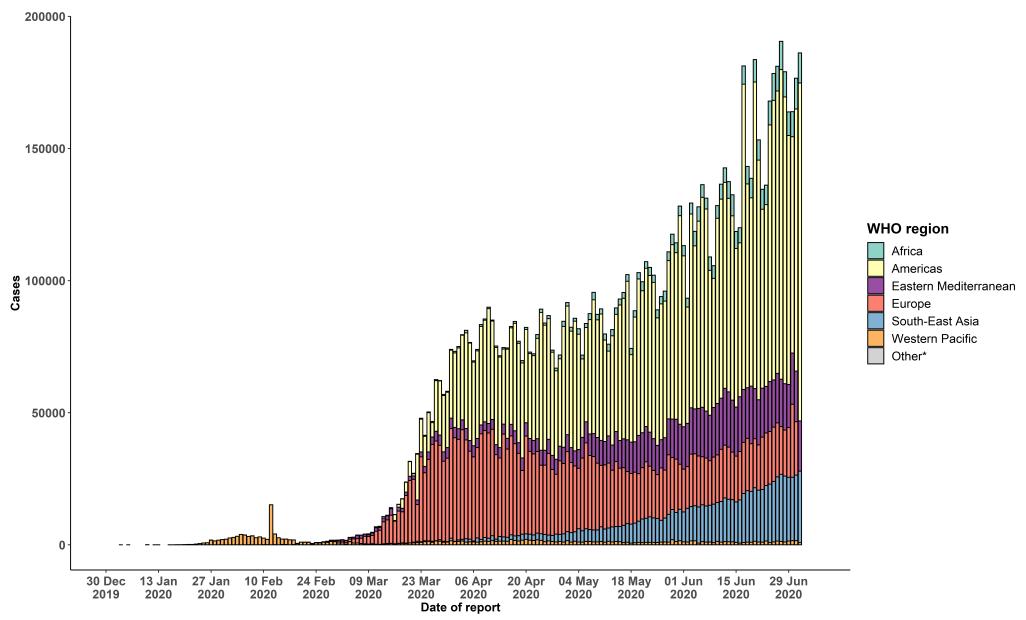

#### **Surveillance**

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 27 June to 3 July \*\*

<sup>\*\*</sup>See Annex 1 for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 3 July\*\*

<sup>\*\*</sup>See <u>Annex 1</u> for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 3 July 2020\*\*

#### Case definitions

WHO periodically updates the <u>Global Surveillance for human infection with coronavirus disease (COVID-19)</u> document which includes surveillance definitions.

#### **Definition of COVID-19 death**

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available <a href="https://example.com/here">here</a> and <a href="https://example.com/here">here</a>.

#### **Annex 1: Data, table and figure notes**

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on <u>WHO case</u> <u>definitions</u>, unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other\*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see <a href="covid19.who.int">covid19.who.int</a> for the most up-to-date data.

#### Additional table notes

<sup>1</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area
- Pending: transmission classification has not been reported to WHO

ii "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

#### Country, territory, or area-specific updates and errata

- Update 3 July 2020, Netherlands: Counts adjusted retrospectively by national authorities: 4 deaths were excluded on 1 July 2020 and 2 deaths were excluded on 2 July 2020.
- **Update 3 July 2020, Germany:** Counts adjusted retrospectively by national authorities: 503 cases and 9 deaths were added for 2 July 2020.
- **Update 3 July 2020, the United Kingdom:** Counts adjusted by national authorities to align with change in methodology for reporting positive cases, and a revision of historical data: 29 726 cases have been excluded.
- **Erratum 3 July 2020:** In Figure 2 of the initial publication of this situation report data was inaccurately reflected. The figure has now been updated.
