

Coronavirus disease (COVID-19)

Situation Report - 132

Data as received by WHO from national authorities by 10:00 CEST, 31 May 2020

Highlights

Today we celebrate <u>World No Tobacco Day.</u> Smoking kills 8 million people worldwide each year and is <u>associated with increased severity of disease and death in hospitalized COVID-19 patients.</u>

People living with noncommunicable diseases (NCDs) are more vulnerable to becoming severely ill or dying from COVID-19. The pandemic has also caused NCD service disruption according to <u>preliminary results of a rapid assessment</u>, and WHO encourages governments to 'build back better'.

The President of Costa Rica and WHO Director-General Dr Tedros launched the <u>COVID-19</u> <u>Technology Access Pool</u>, a policy initiative aimed at making vaccines, tests, treatments and other health technologies to fight COVID-19 accessible to all. The initiative has <u>five priority</u> <u>areas</u>.

Dr Hans Henri P. Kluge, WHO Regional Director for Europe, has released a statement analysing the COVID-19 pandemic in Europe and emphasizing that <u>recovery must lead to a different economy</u>, an economy of well-being.

The WHO Regional Office for Africa has urged caution as countries ease lockdowns. WHO Regional Director Dr Moeti stressed that "Ending a lockdown is not an event, but a process..."

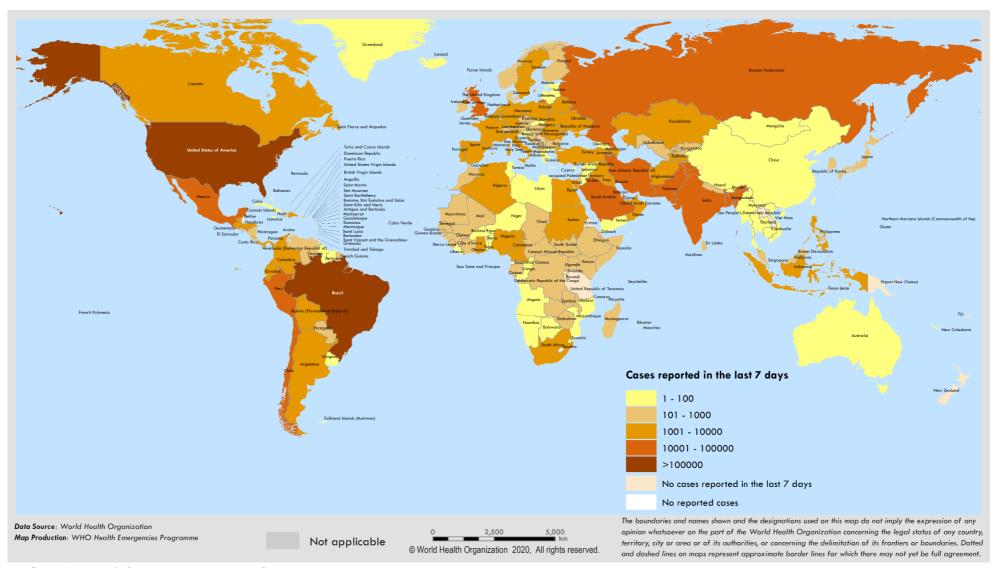

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	5 934 936 cases (117 551)	367 166 deaths (4 461)
Africa	100 610 cases (3 708)	2 554 deaths (72)
Americas	2 743 793 cases (66 293)	157 702 deaths (3 094)
Eastern Mediterrar	nean 505 001 cases (15 080)	12 353 deaths (275)
Europe	2 142 547 cases (20 197)	180 085 deaths (732)
South-East Asia	260 579 cases (11 054)	7 431 deaths (274)
Western Pacific	181 665 cases (1 219)	7 028 deaths (14)

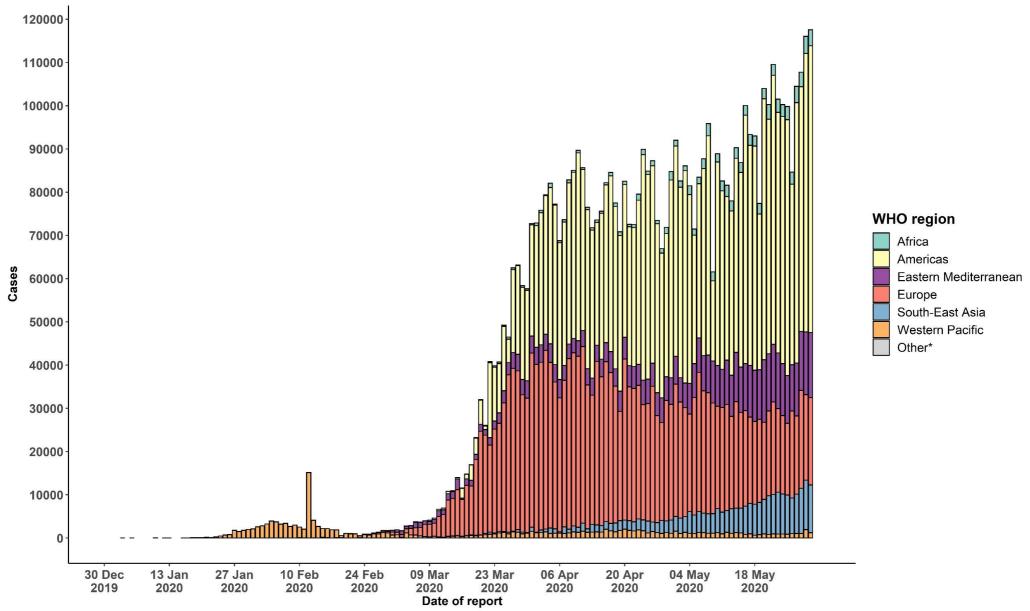

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 25 May to 31 May**

^{**}See Annex 1 for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December 2019 through 31 May 2020**

^{**}See Annex 1 for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 31 May 2020**

Reporting Country/Territory/Area	Total confirmed cases	Total confirmed new cases	Total deaths	Total new deaths	Transmission classification ⁱ	Days since last reported case

Case definitions

WHO periodically updates the <u>Global Surveillance for human infection with</u> <u>coronavirus disease (COVID-19)</u> document which includes surveillance definitions.

Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available here.

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cutoff times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on <u>WHO case</u> <u>definitions</u>, unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

¹ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, may be revised as new information becomes available, and are based on the highest category reported. Differing degrees of transmission may be present within countries/territories/areas. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected.
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission
 defined through an assessment of factors including, but not limited to: large
 numbers of cases not linkable to transmission chains; large numbers of cases
 from sentinel lab surveillance; and/or multiple unrelated clusters in several areas
 of the country/territory/area.
- Pending: transmission classification has not been reported to WHO.

ii "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific updates and errata

No new updates/errata. For previous information, see the <u>log of major changes</u> and <u>errata in WHO daily aggregate case and death count data</u>.
