### Definition

**Safe water**: fecal coliform count of 0 organisms per 100 ml of water

**Improved source of water**: type of water source that, by nature of its construction or through active intervention, is likely to be protected from outside contamination, in particular from contamination with fecal matter.

**Domestic purposes**: bathing, drinking and cooking

### Corresponding 4W sub indicator

- **Number of functional improved water sources (Handpump)** in the site operating at the end of the reporting period
- **Number of functional improved water sources (tapstand/hand dug well)** in the site operating at the end of the reporting period
- **Number of people who received safe drinking water (through household water filters or centralized water treatment system)**
- **Number of litres of water supplied by water boating/trucking during water scarcity to total population in the site period**

### Parameter/Assumptions

**WASH & Health Integrated Analysis by IDPs Site**

- % of people benefitting from safe/improved drinking water, meeting demand for domestic purposes, at minimum/agreed standards
- % of people benefitting from a functional excreta disposal system, reducing safety/public health/environmental risks
- % of People benefitting from timely/adequate/tailored personal hygiene items and receiving appropriate/community tailored messages that enable health seeking behavior
- Proportional morbidity of AWD

### Water Quality Testing at Water Sources & Proportional morbidity of AWD

- % of people benefitting from safe/improved drinking water, meeting demand for domestic purposes, at minimum/agreed standards
- % of people benefitting from a functional excreta disposal system, reducing safety/public health/environmental risks
- % of People benefitting from timely/adequate/tailored personal hygiene items and receiving appropriate/community tailored messages that enable health seeking behavior
- Proportional morbidity of AWD

### Water Quality Testing at Household & Proportional morbidity of AWD

- % of people benefitting from safe/improved drinking water, meeting demand for domestic purposes, at minimum/agreed standards
- % of people benefitting from a functional excreta disposal system, reducing safety/public health/environmental risks
- % of People benefitting from timely/adequate/tailored personal hygiene items and receiving appropriate/community tailored messages that enable health seeking behavior
- Proportional morbidity of AWD
