Introduction

In April 2014, the Government of the Republic of the Union of Myanmar conducted its latest census, after three decades without a Population and Housing Census. In the post-independence period, comprehensive population and housing censuses were only successfully undertaken in 1973, 1983 and most recently in April 2014.

Censuses are an important source of benchmark information on the characteristics of the population and households in every country. One unique feature of a census is its ability to provide information down to the lowest administrative level. Such information is vital for planning and evidence based decision-making at every level. Additional data uses include allocation of national resources; the review of administrative boundaries; the positioning of social infrastructures, drawing national development plans, service provision and developing social infrastructure, and for humanitarian preparedness and response.

The results of the 2014 Census have been published so far in a number of volumes. The first was the Provisional Results released in August 2014. The Census Main Results were launched in May 2015. These included The Union Report, Highlights of the Main Results, and reports of each of the 15 States and Regions. The reports on Occupation and Industry and Religion were launched in March 2016 and July 2016, respectively. All the publications are available online at <http://www.dop.gov.mm/> and <http://myanmar.unfpa.org/node/15104>.

The current set of the 2014 Census publications comprise township and sub-township reports. Their preparation involved collaborative efforts of the Department of Population and UNFPA. This report contains selected demographic and socio-economic characteristics of Ingyanyan Township in Kachin State. The information included in this report is the situation of 2014 March 29, Census night. Township level information is very important. However, the level of confidence of township estimates is not the same as Union level information. Some of the townships have relatively small populations; the interpretation of these estimates should be made with caution. Some of the indicators, such as IMR/U5MR, were adopted only after careful analysis considering a number of factors to ensure consistency in the results. Estimates for townships with relatively small number of observations should not be taken as exact estimates of the mortality level, but rather they should be regarded as reasonable indicators for the scale of mortality risk they experience, an indication of which townships are better off and which are in a more vulnerable situation.

Census information on Ingyanyan Township

(A) Demographic Characteristics

Total population	1,732 *		
Males	946		
Females	786		
Sex ratio	120 males per 100 females		
Percentage of urban population	25.7%		
Area (Km ²)	4,776.1 **		
Population density (persons per Km ²)	0.4 persons		
Number of wards	4		
Number of village tracts	2		
	Total	Urban	Rural
Population in conventional households	1,420	375	1,045
Number of conventional households	285	78	207
Mean household size	5.0 persons ***		
<ul style="list-style-type: none"> • In Ingyanyan Township, there are fewer females than males with 120 males per 100 females. • The majority of the people in the Township live in rural areas with only (25.7%) living in urban areas. • The population density of Ingyanyan Township is 0.4 persons per square kilometre. • There are 5.0 persons living in each household in Ingyanyan Township. This is higher than the Union average of (4.4 persons). 			

Note: * Includes both household population and institution population.

** Settlement and Land Record Department, Ministry of Agriculture, Livestock and Irrigation, (2014-2015)

*** Calculated based on conventional household population

Table 1: Population and number of conventional households by sex by ward and village tract; Ingyanyan Township (Myitkyina District, Kachin State)

Sr	Ward/Village Tract	No. of Conventional households	Population		
			Total	Males	Females

Figure 2: Population by broad age groups, Ingyanyan Township

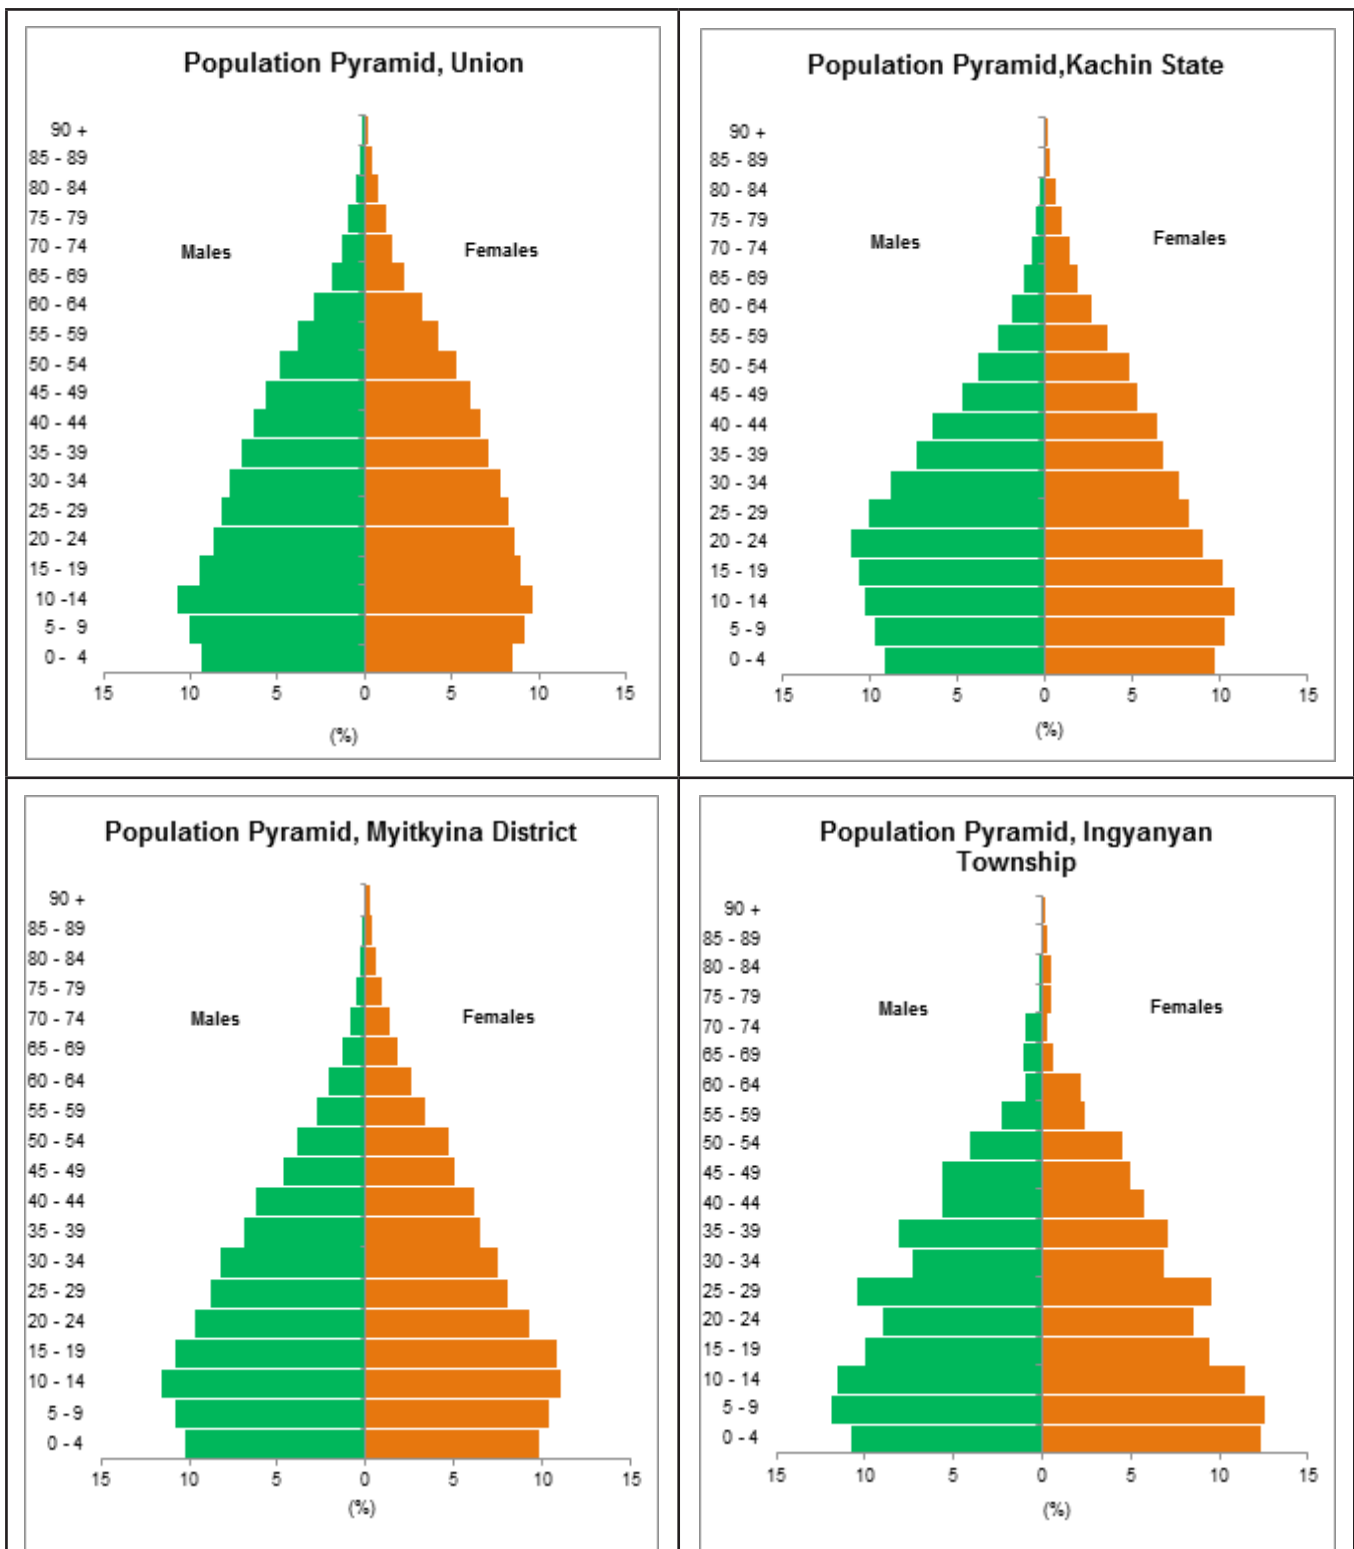

Table 2: Population by 5-year age groups, Ingyanyan Township

Age groups	Total	Males	Females
Total	1,732	946	786
0 - 4	199	102	97
5 - 9	211	112	99
10 - 14	199	109	90
15 - 19	169	95	74
20 - 24	152	85	67
25 - 29	174	99	75
30 - 34	123	69	54
35 - 39	133	77	56
40 - 44	98	53	45
45 - 49	92	53	39
50 - 54	75	39	36
55 - 59	41	22	19
60 - 64	26	9	17
65 - 69	15	10	5
70 - 74	11	9	2
75 - 79	6	2	4
80 - 84	5	1	4
85 - 89	2	-	2
90 +	1	-	1

- The proportion of productive working population between 15 to 64 years of age in Ingyanyan Township is 62.5 per cent.
- The proportion of children aged 14 and below together with the proportion of the elderly aged 65 and over are less than the proportion of the working age group population.
- Fewer proportions of children and elderly reduce the dependency of those age groups on the working age population.

Figure 3: Population pyramid (Union, Kachin State, Myitkyina District and Ingyanyan Township)

- The population has slightly declined in age group 0-4 and highest in age group 5-9.
- Compared to Union level, there is a smaller percentage of working age group 15-64 population in Ingyanyan Township.
- From age group 0-4 to 55-59, there are more males than females in all age groups.

(B) Religion

- At the Union level, the composition of the population by religion is: 87.9% Buddhist, 6.2% Christian, 4.3% Islam, 0.5% Hindu, 0.8% Animist, 0.2% Other religion and 0.1% No religion.
- In Kachin State, it is 64.0% Buddhist, 33.8% Christian, 1.6% Islam, 0.4% Hindu, 0.2% Animist, and less than 0.1% each for Other religion, and those with No religion respectively.

Note: * Less than 0.1 per cent.

(C) Education

Table 3: Population aged 5 - 29 and current school attendance by sex by age

Age	Total population			Currently attending		
	Total	Males	Females	Total	Males	Females
5	41	24	17	6	4	2
6	47	18	29	27	9	18
7	34	19	15	24	12	12

12	40	26	14	35	23	12
13	40	21	19	35	18	17
14	29	10	19	21	8	13
15	27	11	16	21	9	12
16	26	11	15	19	10	9
17	25	14	11	16	8	8
18	28	10	18	9	1	8
19	25	15	10	4	2	2
20	25	12	13	-	-	-
21	21	11	10	3	1	2
22	16	7	9	1	1	-
23	23	8	15	-	-	-
24	17	10	7	1	1	-
25	28	10	18	1	-	1
26	12	5	7	-	-	-
27	27	14	13	-	-	-
28	25	12	13	2	1	1
29	18	8	10	-	-	-

Figure 5: School attendance by age, Union, Kachin State and Ingyanyan Township

Figure 6: School attendance by age by sex, Union and Ingyanyan Township

- School attendance in Ingyanyan Township drops after age 14 for females.
- The school attendance of males and females in Ingyanyan Township is fluctuating.

Figure 7: Literacy rate, Kachin State (aged 15 and over)

Union	: 89.5%
Kachin State	: 91.7%
Myitkyina District	: 89.0%
Ingyanyan Township	: 80.8%

Table 4: Youth literacy rate (15 - 24), Ingyanyan Township

Sex	Total Population (15 - 24)	Literacy Rate (15 - 24)
Total	233	91.4
Males	109	88.1
Females	124	94.4

- The literacy rate of those aged 15 and over in Ingyanyan Township is 80.8 per cent. It is lower than the literacy rate of Kachin State (91.7%) and the Union (89.5%). Female literacy rate is 76.1 per cent and for the males it is 86.0 per cent.
- The literacy rate for youth aged 15-24 is 91.4 per cent with 94.4 per cent for females and 88.1 per cent for males.

Table 5: Population aged 25 and over by highest level of education completed, urban/rural and sex

	Total	None	% Never attended	Primary school		Middle school (grade 6 - 9)	High school (grade 10 - 11)	Diploma	University/ College	Post-graduate and above	Vocational training	Other
				(grade 1 - 4)	(grade 5)							
Total	802	162	20.2	235	106	165	72	1	47	14	-	-
Urban	206	53	25.7	37	22	32	23	1	27	11	-	-
Rural	596	109	18.3	198	84	133	49	-	20	3	-	-
Males	443	56	12.6	115	66	115	47	1	41	2	-	-
Females	359	106	29.5	120	40	50	25	-	6	12	-	-

- Some 20.2 per cent of the population aged 25 and over have never been to school.
- Of the rural population aged 25 and over, 18.3 per cent have never been to school.
- There are 12.6 per cent of males aged 25 and over who have never attended school as against 29.5 per cent for females.
- Among those aged 25 and over, 13.2 per cent has completed primary school (grade 5) and only 5.9 per cent has completed university/college education.

(D) Economic Characteristics

Table 6: Population aged 10 and over by labour force participation rate and unemployment rate by sex and age group

Age groups	Labour Force Participation Rate		
	Total	Males	Females
10-14	7.0	10.1	3.3
15 - 19	49.7	66.3	28.4
20 - 24	86.2	90.6	80.6
25 - 29	93.1	99.0	85.3
30 - 34	95.1	98.6	90.7
35 - 39	94.0	98.7	87.5
40 - 44	96.9	100.0	93.3
45 - 49	96.7	98.1	94.9
50 - 54	93.3	97.4	88.9
55 - 59	92.7	100.0	84.2
60 - 64	65.4	100.0	47.1
65 - 69	53.3	70.0	20.0
70 - 74	45.5	55.6	-
75+	28.6	33.3	27.3
15 - 24	67.0	77.8	53.2
15 - 64	85.7	92.5	77.2

Age groups	Unemployment Rate		
	Total	Males	Females
10-14	-	-	-
15 - 24	0.5	-	1.3
15 - 64	0.2	0.2	0.3
65+	-	-	-

- Labour force participation rate for the population aged 15-64 in Ingyanyan Township is 85.7 per cent.
- The labour force participation rate of females is 77.2 per cent and is much lower than that of their male counterparts which is 92.5 per cent.
- In Ingyanyan Township, labour force participation rate for the population aged 10-14 is 7.0 per cent.
- The unemployment rate for those aged 15-64 in Ingyanyan Township is 0.2 per cent. There is not much difference between the unemployment rate for males (0.2%) and for females (0.3%).
- The unemployment rate for young females aged 15-24 is 1.3 per cent.

Table 7: Population 10 years and over not in the labour force by usual activity status and sex

Sex	Usual activity status						
	Total	Did not seek work	Full time student	Household worker	Pensioner, retired, elderly	Ill, disabled	Other
Total	363	-	71.3	13.8	8.3	1.1	5.5
Males	152	-	83.6	1.3	5.9	2.6	6.6
Females	211	-	62.6	22.7	10.0	-	4.7

- Among those aged 10 and over who are not in the labour force, 83.6 per cent of males and 62.6 per cent of females are full time students.

Table 8: Employed persons aged 15 - 64 by occupation by sex

Occupation	Employed persons			Per cent		
	Total	Males	Females	Total	Males	Females
Total	663	342	321	100.0	100.0	100.0
Managers	2	1	1	0.3	0.3	0.3
Professionals	5	2	3	0.8	0.6	0.9
Technicians and Associate Professionals	12	8	4	1.8	2.3	1.2
Clerical Support Workers	3	3	-	0.5	0.9	-
Services and Sales Workers	53	20	33	8.0	5.8	10.3
Skilled Agricultural, Forestry and Fishery Workers	381	188	193	57.5	55.0	60.1
Craft and Related Trades Workers	32	28	4	4.8	8.2	1.2

Not stated	26	17	9	3.9	5.0	2.8

Figure 11: Percentage of employed persons aged 15 - 64 by industry by sex, Union, Kachin State and Ingyanyan Township

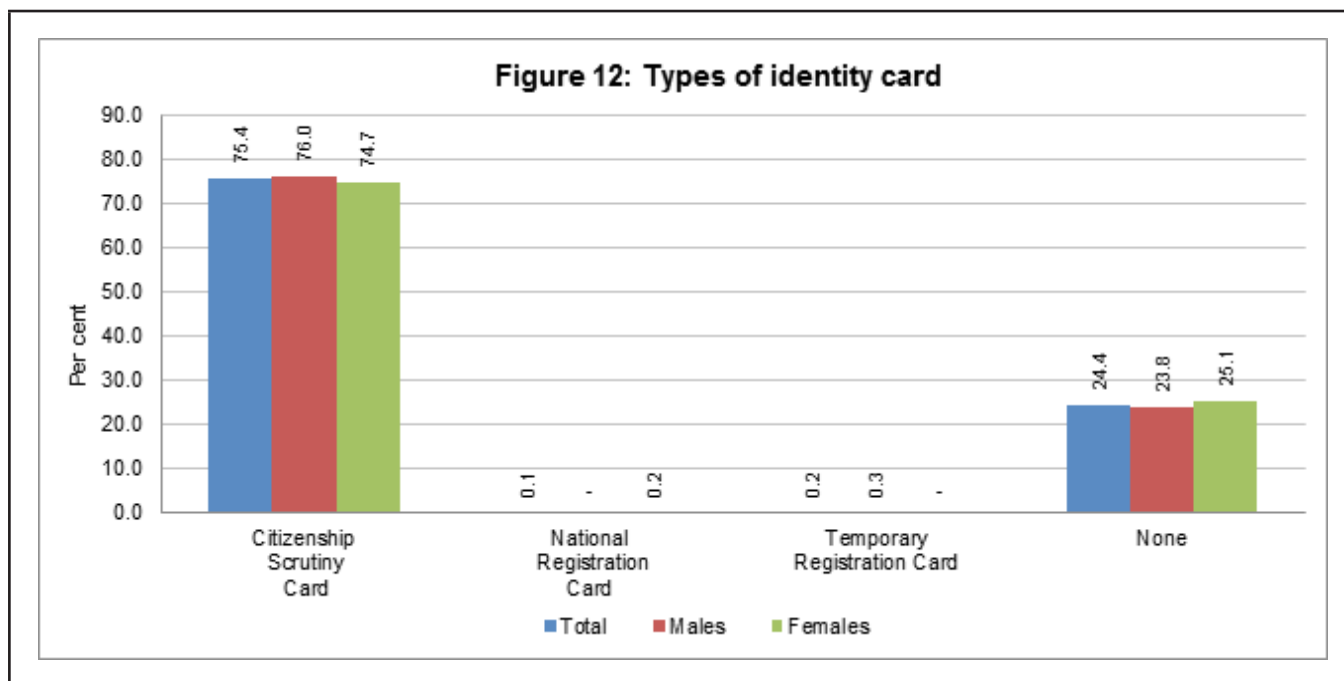

- In Ingyanyan Township, the proportion of employed persons working in the industry of “Agriculture, forestry and fishing” is the highest with 77.4 per cent.
- The second highest industry is “Wholesale and retail trade; repair of motor vehicles and motorcycles” at 5.4 per cent.
- There are 72.5 per cent of males and 82.6 per cent of females working in “Agriculture, forestry and fishing” industry.
- In Kachin State, there are 48.7 per cent of employed population working in “Agriculture, forestry and fishing” industry and 12.3 per cent in “Wholesale and retail trade; repair of motor vehicles and motorcycles” industry.

(E) Identity Cards

Table 10: Population aged 10 and over by type of identity card, urban/rural and sex

	Citizenship Scrutiny Card	Associate Scrutiny Card	Naturalised Scrutiny Card	National Registration Card	Religious Card	Temporary Registration Card	Foreign Registration Card	Foreign Passport	None
Total	997	-	-	*	-	*	-	-	322
Urban	272	-	-	-	-	*	-	-	56
Rural	725	-	-	*	-	*	-	-	266
Males	556	-	-	-	-	*	-	-	174
Females	441	-	-	*	-	-	-	-	148

Note: * Less than 20 cards.

- In Ingyanyan Township, 75.4 per cent of the population aged 10 and over have Citizenship Scrutiny Card while 24.4 per cent have none.
- Analysis by sex shows that 23.8 per cent of males and 25.1 per cent of females do not have any type of card.

(F) Disability

Table 11: Population by disability prevalence rate and type of disability by sex by age group

Age groups	Total Population				Type of disability

65+	22	13	9	40.9	6	1	2	2
Females	786	739	47	6.0	19	24	9	19
0 -14	286	284	2	0.7	-	1	1	1
15-64	482	444	38	7.9	15	18	7	15
65+	18	11	7	38.9	4	5	1	3

- Six in every 100 persons in Ingyanyan Township have, at least, one form of disability.
- Slightly less females than males have disability.
- The prevalence of disability increases with age and it increases considerably at elderly group age 65 and above.
- Difficulty with seeing was the highest among all forms of disability followed by hearing.

(G) Housing Conditions and Household Amenities

Type of housing unit

Table 12: Conventional households by type of housing unit by urban/rural

Residence	Total	Apartment/ Condominium	Bungalow/ Brick house	Semi-pacca house	Wooden house	Bamboo house	Hut 2 - 3 years	Hut 1 year	Other
Total	285	1	-	1	5	91	1	0	-
Urban	78	4	-	-	5	85	5	1	-
Rural	207	-	-	2	5	93	-	-	-

- The majority of the households in Ingyanyan Township are living in bamboo houses (90.5%) followed by households in wooden houses (5.3%).
- Some 84.6 per cent of urban households and 92.8 per cent of rural households live in bamboo houses.

Type of toilet

Figure 14: Proportion of households with access to improved sanitation

Union	: 74.3%
Kachin State	: 85.5%
Myitkyina District	: 80.9%
Ingyanyan Township	: 45.6%

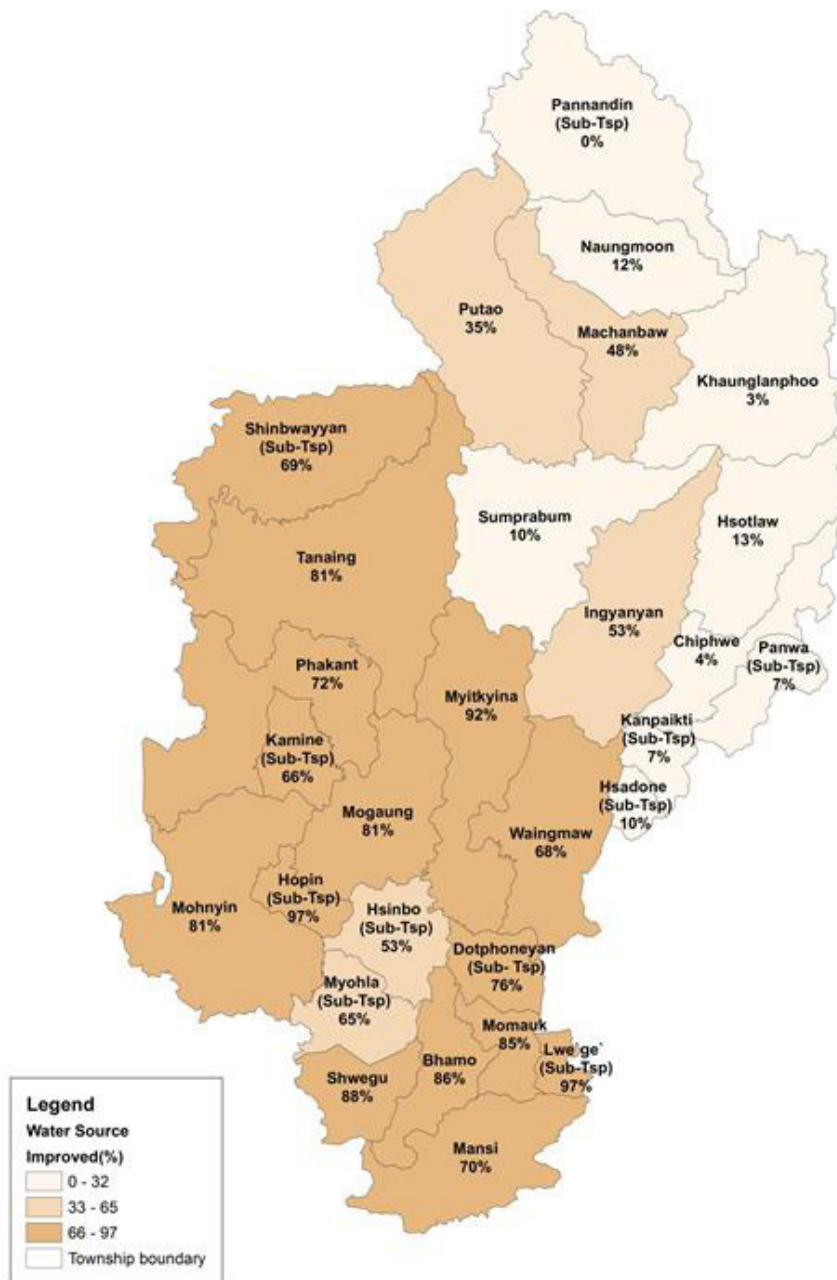

Table 13: Conventional households by type of toilet by urban/rural

Type of toilet		Total	Urban	Rural
Flush		-	-	-
Water seal (Improved pit latrine)		45.6	52.6	43.0
<i>Improved sanitation</i>		45.6	52.6	43.0
Pit (Traditional pit latrine)		40.7	41.0	40.6
Bucket (Surface latrine)		3.2	-	4.3
Other		-	-	-
None		10.5	6.4	12.1
Total	Per cent	100.0	100.0	100.0
	Number	285	78	207

- Some 45.6 per cent of the households in Ingyanyan Township have improved sanitation facilities.
- Compared to other townships in Kachin State, Ingyanyan belongs to the proportion group (37-66) of households with improved sanitation facilities.
- The proportion of households with improved sanitation facilities in Kachin State is 85.5 per cent while it is 74.3 per cent at the Union level.
- Some 10.5 per cent of the households in the township have no toilet facilities. For the entire Kachin State, it is 2.0 per cent.
- In the rural areas of Ingyanyan Township, 12.1 per cent of the households have no toilet facilities.

Source of drinking water

Figure 15: Proportion of households with access to improved source of drinking water

Union	: 69.5%
Kachin State	: 76.6%
Myitkyina District	: 77.3%
Ingyanyan Township	: 53.3%

Table 14: Conventional households by source of drinking water by urban/rural

Source of drinking water		Total	Urban	Rural
Tap water/ Piped		20.3	-	28.0
Tube well, borehole		-	-	-
Protected well/ Spring		33.0	59.0	23.2
Bottled water/ Water purifier		-	-	-
<i>Total improved drinking water</i>		<i>53.3</i>	<i>59.0</i>	<i>51.2</i>
Unprotected well/Spring		7.4	25.6	0.5
Pool/Pond/ Lake		0.7	-	1.0
River/stream/ canal		12.6	7.7	14.5
Waterfall/ Rain water		26.0	7.7	32.8
Other		-	-	-
<i>Total unimproved drinking water</i>		<i>46.7</i>	<i>41.0</i>	<i>48.8</i>
Total	Per cent	100.0	100.0	100.0
	Number	285	78	207

- In Ingyanyan Township, 53.3 per cent of households use improved sources of drinking water (tap water/piped and protected well/spring).
- Compared to other townships in Kachin State, it belongs to the (33-65) per cent group and it is lower than the Union average (69.5%).
- Some 33.0 per cent of the households use water from protected well/spring and 26.0 per cent use water from waterfall/rain water.
- Some 46.7 per cent of the households use water from unimproved sources.
- In rural areas, 48.8 per cent of the households use water from unimproved sources for drinking water.

Source of lighting

Figure 16: Proportion of households using electricity for lighting

Union	: 32.4%
Kachin State	: 30.3%
Myitkyina District	: 36.3%
Ingyanyan Township	: 16.5%

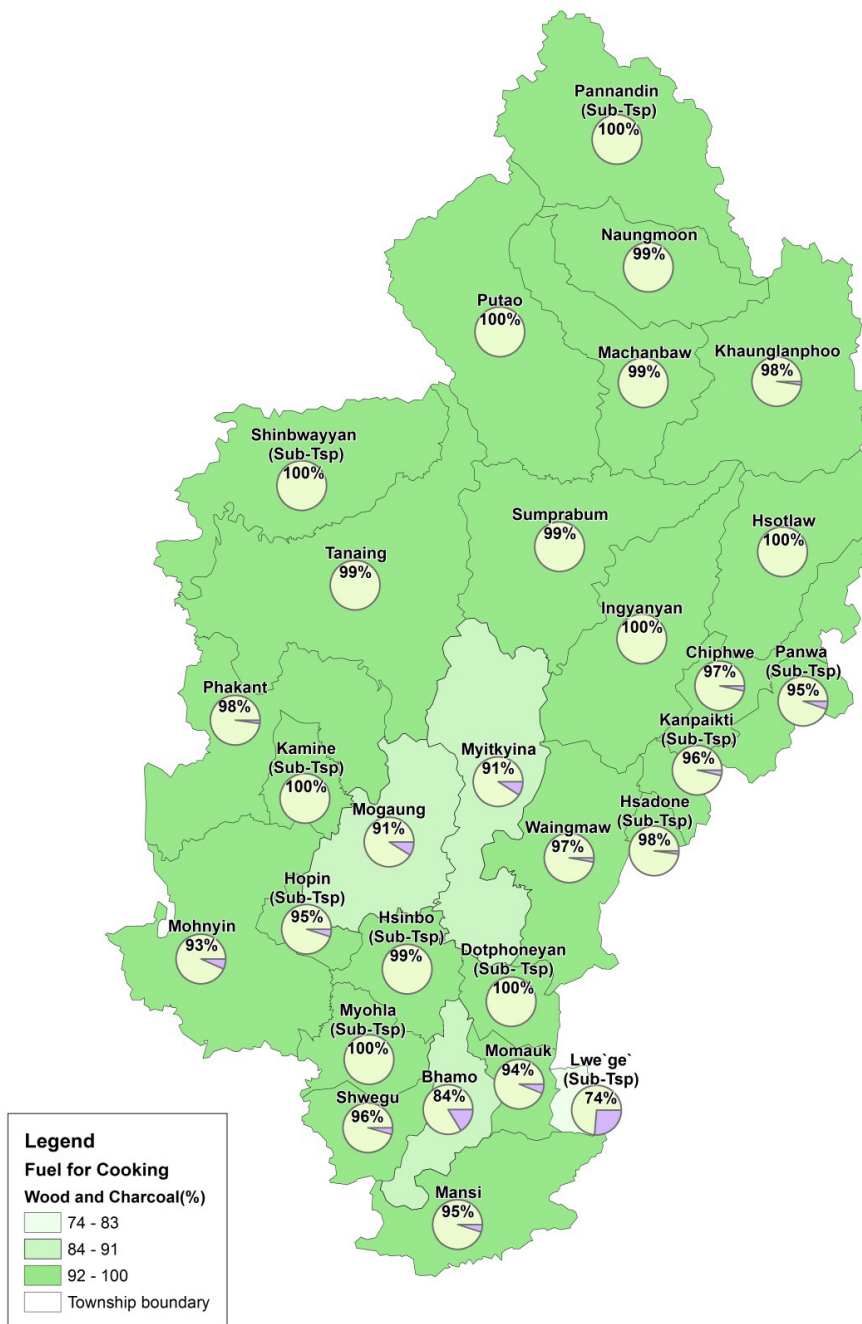

Table 15: Conventional households by source of lighting by urban/rural

Source of lighting		Total	Urban	Rural
Electricity		16.5	59.0	0.5
Kerosene		0.4	-	0.5
Candle		57.5	35.9	65.7
Battery		0.4	-	0.5
Generator (private)		1.4	1.3	1.4
Water mill (private)		1.1	2.6	0.5
Solar system/energy		22.5	1.3	30.4
Other		0.4	-	0.5
Total	Per cent	100.0	100.0	100.0
	Number	285	78	207

- In Ingyanyan Township, 16.5 per cent of the households use electricity for lighting. This proportion belongs to the (4-32) per cent group in electricity usage compared to other townships in Kachin State. The percentage of households that use electricity in Kachin State is 30.3 per cent.
- The use of candle for lighting is the highest in the township with 57.5 per cent.
- In rural areas, 65.7 per cent of the households mainly use candle for lighting.

Type of cooking fuel

Figure 17: Proportion of households using wood-related cooking fuel

Union	: 81.0%
Kachin State	: 93.7%
Myitkyina District	: 93.9%
Ingyanyan Township	: 100.0%

Table 16: Conventional households by type of cooking fuel by urban/rural

Type of cooking fuel		Total	Urban	Rural
Electricity		-	-	-
LPG		-	-	-
Kerosene		-	-	-
BioGas		-	-	-
Firewood		98.6	100.0	98.1
Charcoal		1.4	-	1.9
Coal		-	-	-
Other		-	-	-
Total	Per cent	100.0	100.0	100.0
	Number	285	78	207

- In Ingyanyan Township, households mainly use wood-related fuels for cooking with 98.6 per cent using firewood and 1.4 per cent using charcoal.
- Some 98.1 per cent of households in rural areas use firewood and 1.9 per cent use charcoal.

Communication and related amenities

Table 17: Conventional households by availability of communication and related amenities by urban/rural

Residence	Conventional households	Radio	Television	Land line phone	Mobile phone	Computer	Internet at home	% with none of the items	% with all of the items
Total	285	40.4	20.4	1.8	7.7	1.1	0.4	49.5	-
Urban	78	50.0	24.4	2.6	15.4	3.8	1.3	43.6	-
Rural	207	36.7	18.8	1.4	4.8	-	-	51.7	-

- Some 40.4 per cent of the households in Ingyanyan Township have access to radio and is the highest among the access of communication and related amenities. Some 50.0 per cent of urban households and 36.7 per cent of rural households have access to radio.

Figure 18: Percentage of households with access to radio and television

- In Ingyanyan Township, 40.4 per cent of the households having a television and about one in five households (20.4%) reported having a radio.

Figure 19: Proportion of households with access to mobile phone

Union	: 32.9%
Kachin State	: 37.5%
Myitkyina District	: 42.9%
Ingyanyan Township	: 7.7%

- Only 7.7 per cent of the households in Ingyanyan Township and 37.5 per cent of the households in Kachin State reported having mobile phones.

Transportation items

Table 18: Conventional households by availability of transportation items by urban/rural

State/District/ Township	Conventional households	Car/Truck/ Van	Motorcycle/ Moped	Bicycle	4-Wheel tractor	Canoe/ Boat	Motor boat	Cart (bullock)
Kachin State	269,365	10,911	188,959	94,853	14,759	10,977	6,252	70,938
Urban	95,859	5,765	75,218	44,841	2,780	1,683	1,249	10,459
Rural	173,506	5,146	113,741	50,012	11,979	9,294	5,003	60,479
Myitkyina District	88,643	4,103	62,774	32,469	1,882	1,879	1,504	15,537
Urban	50,264	3,440	40,587	24,094	969	611	744	4,547
Rural	38,379	663	22,187	8,375	913	1,268	760	10,990
Ingyanyan Township	285	1	105	3	1	3	4	74
Urban	78	-	36	2	1	-	-	22
Rural	207	1	69	1	-	3	4	52

- In Ingyanyan Township, 36.8 per cent of the households have motorcycle/moped as a means of transport and it is the highest proportion, followed by 26.0 per cent of households having cart (bullock).
- Analysis by urban/rural residence, the majority of the households mainly use motorcycle/ moped as a means of transport.

(H) Fertility and Mortality

Fertility

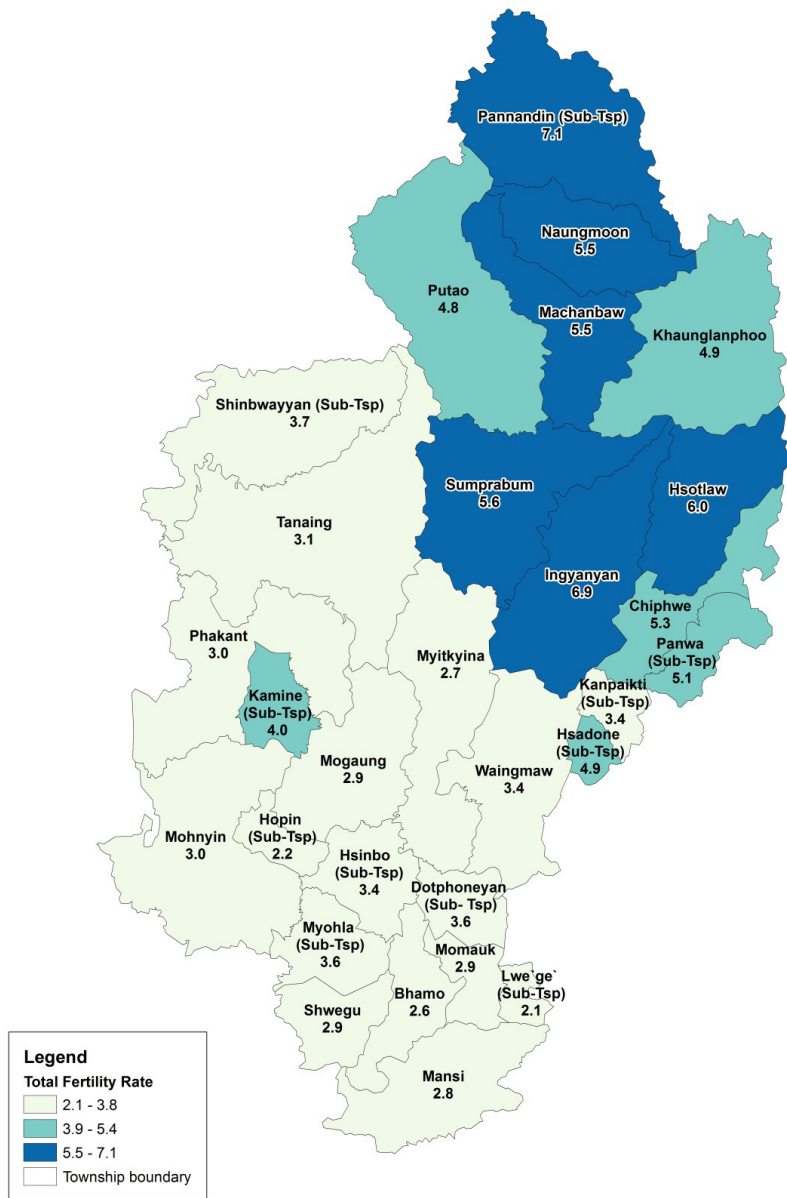

Figure 21: Total fertility rate

Union	: 2.5
Kachin State	: 3.0
Myitkyina District	: 3.1
Ingyanyan Township	: 6.9

Figure 22: Life expectancy (Union and State/Region)

- The expectation of life at birth in Kachin State is 64.2 years and is slightly lower than that of National level at 64.7 years.
- The female life expectancy at 69.3 years is higher than that of the males at 59.4 years.

Childhood Mortality and Maternal Mortality

Figure 23: Infant and Under 5 mortality rates

- The Infant and Under 5 mortality rates in Myitkyina District are lower than the Union average. The Infant mortality in Myitkyina District is 53 deaths under age one per 1,000 live births while Under 5 mortality is 61 deaths under age 5 per 1,000 live births.
- The Infant and Under 5 mortality rates in Ingyanyan Township are higher than those in Kachin State and Myitkyina District. The Infant mortality in Ingyanyan is 105 per 1,000 live births and Under 5 mortality is 121 per 1,000 live births.

- In Kachin State, there are 270 women dying while during pregnancy/delivery or within 42 days of termination of pregnancy for every 100,000 live births.
- The maternal mortality ratio in Kachin State is lower than that of the Union level.
- Compared to the average maternal mortality ratio of 140 for Southeast Asian countries, the maternal mortality ratio of 282 for Myanmar is high.

Definitions and Concepts

Population: The population in this report corresponds to the de-facto population of Myanmar on Census Night (see below).

Census Night: The night between the 29th and the 30th March 2014. Every person in Myanmar was enumerated where they spent the Census Night.

Rural area: Areas classified by the Department of General Administration (GAD) as village tracts. Generally these are areas with low population density and a land use which is predominantly agricultural.

Urban area: Areas classified by the GAD as wards. Generally these areas have an increased density of building structures, population and better infrastructural development.

Population Density: The population density relates to the number of persons in a given administrative area to the surface of the area, expressed in square kilometres (Km²). Areas covered by water are excluded from the calculation.

Mean Household Size: The average number of persons per household (people living in households divided by number of conventional households).

Sex ratio: The number of males for every 100 females in a population.

Dependency ratio: The total dependency ratio is the ratio of dependents (people younger than 15 years and older than 64) to the population of working-age (age 15-64). Data are shown as the proportion of dependents per 100 working-age population. Three different measures can be calculated: total dependency ratio, child dependency ratio and old age dependency ratio.

Child Dependency Ratio: is the proportion of people younger than 15 years to the working age population (15-64).

Old Dependency Ratio: is the proportion of people older than 64 years to the working age population (15-64).

Ageing Index: The number of persons aged 65 years and over per 100 people under the age of 15 years.

Median Age: The age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older.

Education: Education is the process by which people learn through instruction and teaching. The 2014 MPHC placed an emphasis on literacy skills, school attendance and educational attainment. The other categorisations used under education were:

(a) **Literacy:** The ability to read and write in any language with reasonable understanding.

(b) **School attendance:** The attendance at any regular educational institution or systematic instruction at any level of education during the last 12 months. This included schooling at pre-primary, primary, middle, high school and tertiary institutions of higher learning. The options were: (a) Currently attending; (b) Attended previously; (c) Never attended.

(c) **Educational Attainment:** The highest grade/standard/diploma/degree completed within the most advanced level attended in the education system of the country where the education was received. It covered both public and private institutions accredited by government.

Disability: Disability is a situation where a person is at a greater risk than the general population of experiencing restrictions in performing routine activities (including activities of daily living) or participating in roles (such as work) if no supportive measures are offered. The difficulties covered in the 2014 census included:

- (a) **Walking difficulty** (wheel chairs, crutches, limping, problems climbing steps);
- (b) **Seeing difficulty** (low vision, blind);
- (c) **Hearing difficulty** (partially or completely deaf);
- (d) **Mental/Intellectual difficulty** (slow learning development making it hard to compete with their counterparts at school, other mental conditions).

Identity card: An identity card is a document used to verify aspects of a person's personal identity. There are several types of identity cards issued by the Government of Myanmar, and national passports in the case of foreigners.

Labour Force Status: According to the type of usual economic activities during the 12 months before Census Night, all persons 10 years of age and over were classified as follows:

Labour Force: The Labour force is a general term covering “employed” and “unemployed” persons in the population.

Employed: “Employed” persons refer to those who did any work during the time of the week before the census date or worked for more than 6 months in the 12 months before the census date for pay or profit, such as a wage, salary, allowance, business profit, etc. Also included in this category were persons

working in family businesses, on a farm, in a store, in a private hospital etc., even though they were not paid any wages.

Unemployed: “Unemployed” persons refer to those who had no work but were able to work and actually seeking a job during the reference period, or at the time of the census enumeration.

Not in labour force: This category comprised persons who had no work and did not make any positive efforts to find a job during the 6 months before the census date or were unable to work. This included full time students, household work, elderly people, etc.

Employment Status: All employed persons were classified according to the economic activity status in the place where they worked during the last 12 months or if they worked in more than one place, where they worked most of the time. There were five employment categories:

- (a) **Employee (Government):** those employed and working for government including in state organisation institutions.
- (b) **Employee (Private organisation):** those employed and working for private employers or private organisations. All people in private companies, NGOs, international organisations, retail and wholesale enterprises fell under this category.
- (c) **Employer:** persons who during the reference period worked in their own business, which also employed one or more other persons.
- (d) **Own account worker:** self-employed persons who worked in their own business or worked in their own/family business for family gain **and did not have any employees.**
- (e) **Unpaid family worker:** persons who worked in a business, farm, trade or professional enterprise operated by a member of the household/family and received no pay.

Labour force participation rate: The labour force participation rate is the ratio between the labour force and the overall size of the total population of the same age range. This is an important indicator as it portrays the proportion of the population that is economically active.

$$\text{Labour force participation rate} = \frac{\text{Labour force (Employed + Unemployed)}}{\text{Total Population}} \times 100$$

Unemployment rate: The percentage of the total labour force that is unemployed but actively seeking employment and willing to work. These are people who are without work, looking for jobs and available for work.

$$\text{Unemployment rate} = \frac{\text{Unemployed}}{\text{Labour force (Employed + Unemployed)}} \times 100$$

Employment to population ratio: A statistical ratio that measures the proportion of the country's working-age population (ages 15 to 64) that is employed. The International Labour Organization (ILO) states that a person is considered employed if they have worked at least 1 hour in "gainful" employment in the most recent week.

$$\text{Employment to population ratio} = \frac{\text{Employed}}{\text{Total Population}} \times 100$$

Occupation: Occupation refers to the kind of work an employed person did in the establishment during the 12 months (reference period) before the census date. Put differently, occupation is the kind of work done during the last 12 months by the person employed, regardless of the industry of the establishment. In the 2014 Myanmar Census, field data collectors were instructed to collect a detailed description of the work being done such as accounts clerk, data entry operator (clerk), legal secretary, domestic worker, fisherman, human resource manager, etc. If an employed person was engaged in two or more jobs, the kind of work was decided by the work in which he/she was mainly engaged in, that is in terms of time. The occupational classification is based on the ISCO 2008.

Industry: Industry refers to the main activity of the establishment where an employed person usually worked during the 12 months (reference period) before the census date. In the 2014 Myanmar Census, industry was explained to the enumerators as the type of economic activity carried out at the person's place of work. It is defined in terms of the kind of goods produced or services supplied by the enterprise in which the person works and not necessarily the specific duties or functions of the person's job. For example, a clerical officer working in stores within a factory that makes television sets. The industry should be recorded as manufacture of electrical goods. If an employed person worked in two or more establishments, "industry" was decided by the establishment where he/she worked most. The industrial classification is based on the ISIC Revision 4.

Live Birth: A live birth is one where the infant shows one or more of the following signs of life immediately after birth: crying or similar sounds, movement of the limbs or any other parts of the body and/or any other tangible signs of life. The census was concerned only with children born alive. Also collected was information on the last live birth of ever married female respondents.

Total fertility rate (TFR): The average number of children that a woman would give birth to if all women lived to the end of their childbearing years and bore children according to the current schedule of age-specific fertility rates.

$$\text{Total fertility rate (TFR)} = 5 \sum \text{Age specific fertility rate (ASFR)}$$

Age specific fertility rate (ASFR): The age-specific fertility rate measures the annual number of births to women of a specified age or age group per 1,000 women in that age group. Unless otherwise specified, the reference period for the age-specific fertility rates is the calendar year.
