Medical Officer

We are currently recruiting a **Medical Officer**, directly reporting to Field Health Coordinator.

This post is based in Rakhine State.

At Relief International, we are committed to building a representative, inclusive and authentic workplace. We strongly encourage applications from candidates from minoritized backgrounds those who bring lived experience of the contexts in which we work.

We are proud to be a global recruiter, hiring people from around the world. We offer competitive salaries and benefit packages for all staff, that are applied fairly and transparently. This means we are unable to advertise the salary as it is dependent on the local job market of the staff member, we will inform shortlisted candidates of the salary range as part of the selection process.

About Relief International

Relief International (RI) works in 15 countries globally to relieve poverty, ensure well-being and advance dignity. We specialize in fragile settings, responding to natural disasters, humanitarian crises, and chronic poverty.

Main purpose of the role

This project aims to increase access to PHC services across isolated and hard-to-reach Internally displaced persons (IDPs) sites in Mrauk U Township. The aim is to ensure a continuum of PHC and safe delivery care that is accessible at any time to these communities. Relief International has strategized its ongoing programme to build on existing mobile PHC clinics by promoting advocacy, capacity building, and service delivery for staff and communities. The Medical Officer leads the management of the specific mobile SRHR delivery unit.

Overall Objectives (scope)

Provision of effective and efficient PHC delivery services according to RI/MoHS protocols, policies and guidelines ensuring quality service delivery through bridging existing gaps in capacity, demand creation and quality of care of PHC service delivery in Mrauk U Township.

Specific Responsibilities

This position involves approx. 50 % of direct healthcare provision and 50% of management duties, including a small team of health professionals.

Medical Management

- Provide direct routine and on-call PHC services as needed to patients.
- Ensure the quality of the medical management of all patients seen by the health team through direct consultation and supervision, coaching midwives, nurses, pharmacists, and health educators.
- Participate actively in emergency medical response and in coordination with THD as per SOPs.
- Ensure all the medical services and treatments provided are in line with and according to RI and MOHS protocols and guidelines
- Actively participate and responsible of coordinating the referral process for RI in assigned areas.
- Ensure regular follow-up for patients as required.

- Participate and ensure the quality of the health messages delivered during the community and health promotion/education activities, setting capacity building initiatives as appropriate for the health educators.
- Supervise the mobile clinic strictly in regards Universal Precaution, IPC measurements and proper waste management as per RI and international standards.
- Ensure the smooth flow of the clinic and treat the patients with respect, empathy and good personal relationship.
- Ensure patient information and decision rights are respected.
- Ensure the correct management of the pharmacy and emergency stocks.
- Ensure to operation cash voucher assistance program and SRHR related community outreach activity.

General Management

- Prepare and share monthly work plan for clinical health team and ensure the clinic activities and operations run in accordance with the work plan approved by Field Health Coordinator.
- Manage and supervise Nurse, Midwife and Health Educator.
- Take accountability and responsibility for clinical health team operations under the guidance, supervision and management of Field Health Coordinator.
- Support Field Health Coordinator in collaboration with local health partners.

Data Collection and Reporting

- Collect data and timely report on morbidity of patients and data input with the team according to RI standard reporting tools.
- Participate in the collection and analysis of epidemiological data, checking its validity and informing the line manager or Regional Health Unit.
- Monitor that all relevant data are correct and supervise data collection by other staff while ensuring timely reporting to the line manager/Field Health Coordinator.
- Submit monthly report to Line Manager including the recorded databases, summary and overview of status, problems/issues, etc.
- Inform Field Health Coordinator for specific medical needs, including potential disease outbreaks, in intervention settings.
- Monitor the health condition and situation in the camp and report as appropriate

Capacity building

- Collaborate with Health Program Coordinator and under the guidance of Head of Health Technical & Coordination Unit and give theoretical and on-job training to medical and para-medical staffs including Auxiliary Midwife, community health workers from intervention settings depending on needs.

Communication, Coordination, and Supporting as Liaison

- Excellent communication with strong interpersonal skills and able to deal with local communities.
- Maintain good relationship with Basic Health staffs and all the team members from the assigned area.
- Liaise with other field staff during monitoring visit by Senior Staffs from Health Program.
- Collaborate closely with other RI teams, especially Protection.

Assessment

- Carry out assessments as required in areas affected by disasters.
- Collect appropriate data, both quantitative and qualitative, from medical point of view.

- Prepare assessment reports by collecting all necessary inputs from medical team.

Others

- Take part in program meetings, program reviews, and in general staff meetings.
- Adopt non-judgmental attitude, manage patients with compassion, and maintain strict confidentiality and privacy.
- Any others relevant tasks upon special request by line manager according to program needs as required.

About You

You will bring the following experience and skills

- M.B.,B.S degree with valid license
- Previous experience working in INGOs, LNCO is mandatory.
- Good knowledge of primary health care, Nutrition, MNCH and Reproductive Health
- Experience in emergency medical response will be an asset.
- Experience in GBV case Management (desirable)
- Experience working in Management, to be a good team player and good personal skill to co-workers.
- Willing to work for marginalized population in clinic-based setting and in a multicultural context.
- Good knowledge of written and spoken English is essential
- Flexible and empathetic attitude
- Good communication skills between the clients and staff and among the team.
- Able to work under little supervision to complete tasks with timely manner.

Research shows that women and those from marginalized ethnic groups are less likely to apply to jobs, unless they meet every single requirement. If you're excited about this role, but your experience doesn't align with every criteria described, we encourage you to apply anyway, you could be exactly what we need!
