

RESILIENT FUTURES INNOVATION FUND

Objectives of the Fund

- Promote innovative small businesses, social entrepreneurship, and women-led enterprises.
- Support viable business ideas and enterprises that can generate sustainable livelihoods, employment, and local economic value.
- Encourage environmental innovation and circular economy solutions, including waste management, recycling, resource efficiency, and green products or services.
- Promote technology-enabled solutions that strengthen disaster preparedness, climate resilience, sustainable energy, productivity, and market access.
- Identify scalable models that can grow through future investment, partnerships, or replication.

Priority Areas for Proposals

A. Innovative Small Businesses and Social Enterprises

- ✓ Support innovative small businesses and social enterprises that combine commercial viability with positive social or economic impact.

B. Environmental Innovation and Circular Economy

- ✓ Support enterprises and innovative solutions that address environmental challenges while creating economic value and livelihood opportunities.

C. Technology and Innovation for Resilience

- ✓ Support businesses and innovators that use practical, accessible technology to strengthen livelihoods, climate resilience, disaster preparedness, sustainable energy, and market access.

Phase 1 – Innovation and Enterprise Grants

Selected applicants may receive:

- ✓ Technical mentoring and business development support.
- ✓ Market linkages and networking opportunities.
- ✓ Opportunities to showcase promising models to private sector actors, investors, development partners, and other stakeholders.
- ✓ Projects will typically be implemented over 4–6 months.

Phase 2 – Scale- Up Grants

Up to three outstanding initiatives will be selected for Phase 2 Scale-Up Grants

- ✓ Expansion of production or service delivery capacity.
- ✓ Entry into new markets or customer segments. Strengthening supply chains, distribution, or business systems.
- ✓ Investment in technology, equipment, or infrastructure needed for growth.
- ✓ Scaling green, circular economy, climate resilience, or technology-enabled solutions.
- ✓ Replication of a proven model in additional locations or markets. Strengthening investment readiness and partnerships for future growth.

Only shortlisted applicants will be contacted for further discussions and the due diligence process. Applications can be submitted through the link provided here.

Submit the application form with the required supporting documents to Applica.ya111fnfnv4uxn5g@u.box.com by 30th October 2026.
