

Did you or your colleagues join our trainings in the second half of 2024?

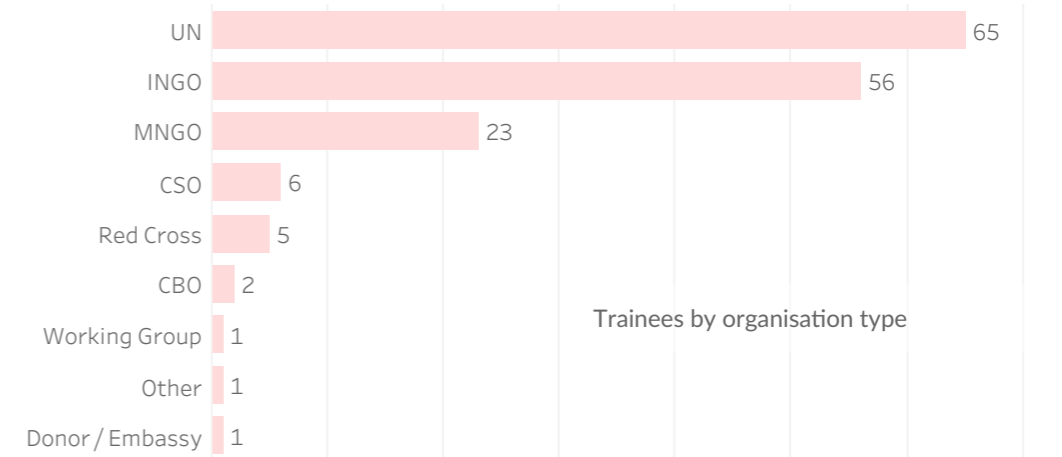

Jul - Dec 2024

If yes, congratulations! We'd like to thank you for your participation and for giving us the chance to share our expertise with you (or your colleagues). If not, don't worry. There is more to come! Subscribe to our newsletter and stay updated on the exciting trainings we have planned. Meanwhile, here's a look at the achievements of our trainings in the second half of 2024. Every course we develop and deliver in Myanmar language aims to strengthen the capacity of humanitarian and development colleagues in data management, analysis, and visualization. Thanks again and we look forward to seeing you in 2025!

160 colleagues from International and Myanmar NGOs (INGO/MGNO), Community-based Organisations (CBO), United Nations agencies (UN), Donors / Embassies, working groups and Red Cross participated in the trainings.

52 % of the trainees are women as careful attention was paid to promoting gender equality and opportunity in our selection of trainees.

Power BI | IM Workshop | QGIS Basic | Basic Mapping | Advanced Excel | Data Viz & Comms

Power BI
An introductory course on Power BI, a powerful data visualization tool for comparing, analyzing, and sharing insights. The course covers Power BI basics: software capabilities, data preparation, chart selection, publishing dashboards, and data management.

IM Workshop
offers a comprehensive introduction to Information Management, covering key skills in data analysis, management, and visualization. Participants will learn statistical techniques, data preparation, visualization tools, and reporting methods to support data-driven decision-making.

QGIS Basic
builds essential GIS capacity for humanitarian and development work using QGIS. The course covers GIS fundamentals, spatial data management, and map creation, including data importing, queries, analysis, digitizing, and custom map layouts.

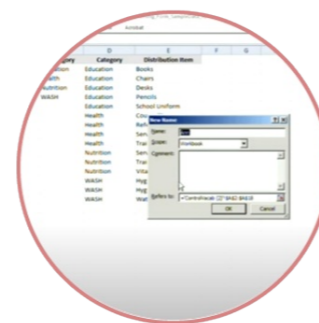

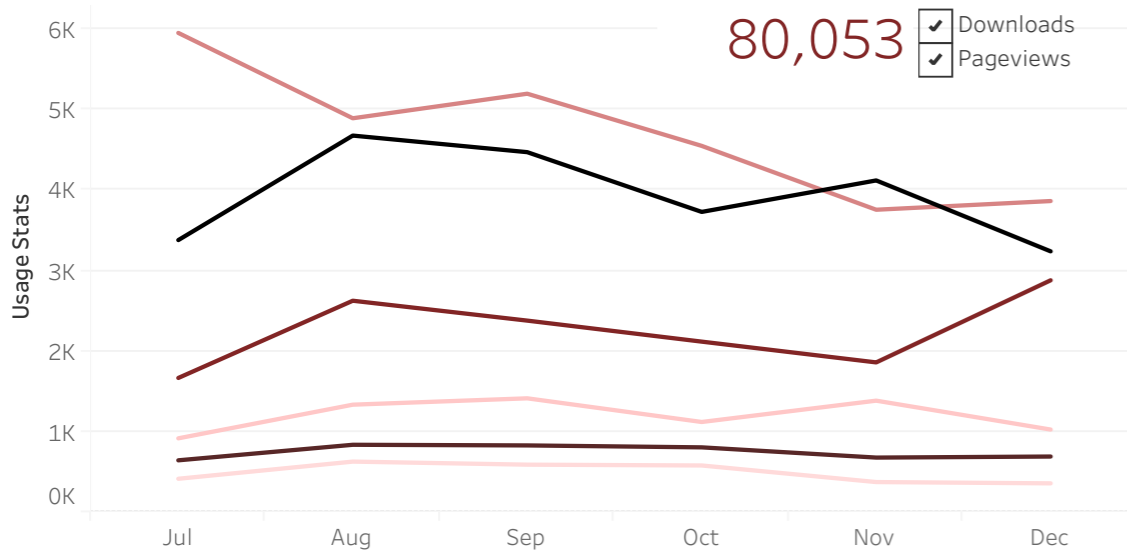

Basic Mapping
explores the basic concepts of cartography and mapping and the use of free online tools as MIMU Map Maker and Google My Maps. It aims to inspire users to reconsider what maps can do and what be done with them, to focus the map message, and design effective maps based on an understanding of how people read them.

Advanced Excel
serves as an advanced level course on using Microsoft Excel. It covers key topics such as data grouping, advanced formulas, Power Query, PowerPivot, conditional formatting, and collaboration tools. Designed for learners with basic Excel knowledge.

Data Viz & Comms
Data Visualisation and Communication Training builds the skills to communicate data-driven insights effectively. It covers choosing appropriate visualizations, applying design principles, and using storytelling to engage stakeholders and drive action.

Subscribe to MIMU Weekly Updates for training opportunities

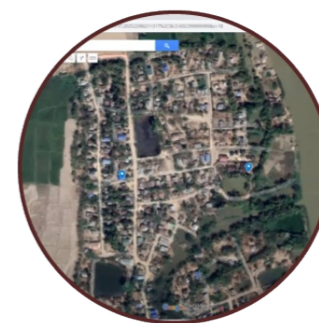

6 Myanmar-language online technical training courses, which have been developed specifically for use with Myanmar staff of humanitarian and development organisations, were also widely used in this period. The online training materials are extensive, covering courses delivered over 3-5 days.

Excel Training

Power BI Training

Basic Mapping Training

Tableau Training

Advanced Excel Training

QGIS Training

We used Tableau to make this bulletin! You can also use Power BI. Both are very good data visualisation tools.
